Allowable Subject Matter

3. Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1-9, the prior art of record fails to show or fairly suggest a method of determining noise in a CATV channel as variously claimed, particularly, the television channel comprising a carrier signal modulated by an information signal, and the digital signal segment comprising a noise signal component and an information signal component, wherein the information signal component has an substantially predetermined signal pattern, processing digital signal component to produce a baseband signal, and obtaining an estimate of the information signal and subtracting the estimate from the baseband signal, thereby producing a noise signal estimate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
